Mental Health wellness is a key factor in creating a  
resilient community

Northern Box Elder County Suicide Prevention Coalition, USU, Garland City and many community partners are creating a green space for the community. A place where people can take advantage of being outdoors, a space to have quiet moments, calm thoughts, reflections, or even meditation, which helps benefit the wellness of the mind. This wellness garden will be open to everyone in our valley, no matter who you are you will find a calming place to relax, reflect or recharge.

Everyone welcome
